

Transforming Education Systems

Transformation starts with a vision of 21st century, deeper learning—a Portrait of a Graduate. Our theory of action helps system leaders activate the vision with strategy and purposeful, intentional shifts to practice—and all along the way, accelerating the vision for every student.

VISION

How are we igniting, or reigniting, a collective community vision for 21st century, deeper learning?

How are we inspiring our staff and community to meaningfully contribute to bringing the vision—our Portrait of a Graduate—to life for every student?

STRATEGY

Are we providing persistent, focused attention on aligning the entire system and executing strategies that result in realizing our vision to produce equitable, deeper learning outcomes for every student?

How do we inspire and invest in educators so they are well equipped to contribute meaningfully to the vision?

PRACTICE

How are we creating conditions that support the shifting role of educators and leaders to bring the vision to life for every student?

How are we thinking differently about the design of professional learning and district resources for leaders and educators?

ACCELERATION

How are we leveraging network opportunities to learn from others and accelerate our education transformation?

How are we contributing to the network to lead and inspire others toward a new vision for our nation's schools?
